

“BEYOND THEORIES OF WEATHER MODIFICATION” - civil society versus geoengineering -

PROGRAM

- 09:00** **Opening**
- 09:05** **Introduction**
Who we are, why we are here, what we want
Esther Ibeas, *Terra SOS-terrible*, Spain.
- 09:10** **CLIMATE MODIFICATION AND GEO-ENGINEERING**
- State of the Question.** Wayne Hall- *Enouranois* - Greece (including extracts from interview with Pat Mooney, ETC group) and **Geoengineering in Europe**, Andrew Johnson, from U.K.
- 09:30** **Europe on the brink: The case of MUOS, Sicily**, Giulietto Chiesa - *Alternativa*, - Journalist, former MEP - Italy; and Antonio Mazzeo, - Journalist and *leader of environmental movements*, Italy.
- 09:50** **CIVIL SOCIETY VERSUS GEO-ENGINEERING**
- Clandestine Aerial Spraying in Europe.** What it is, what its consequences are for people and life on the planet, what has been the response of national governments and of European institutions. Saskia Messenger, *ACSEIPICA*, France; and Désirée Röver, Medical research journalist, *Belfort Group*, Belgium.
- 10:10** Questions, final remarks and petitions from Skyguards to the European institutions, Josefina Fraile, Spain.
- 10:30** **Homage to Mrs. Maj Britt Theorin, former member of the European Parliament, and Mrs. Rosalie Bertell (posthumous) - Closure of the Conference.**

INVITATION TO THE CONFERENCE

“BEYOND THEORIES OF WEATHER MODIFICATION”
- civil society versus geoengineering -

EUROPEAN PARLIAMENT

Rue Wiertz/Wiertzstraat, 60

Altiero Spinelli - ASP 1G3

9th April 2013, from 9.00 to 10.30 a.m.

SKYGUARDS, a European civic platform recently created to confront geo-engineering activities of weather modification within the EU, invites you to this conference graciously patronized by some members of the European Parliament, with special mention of Mrs. Tatjana Zdanoka.

This conference is complemented by a film “Why in the world are they spraying?” to be shown on 8th April at 6.30 p.m. In the European Parliament, Altiero Spinelli - ASP 1G3.

Register as soon as possible with Mrs. Tatjana Zdanoka “tatjana.zdanoka@europarl.europa.eu”. If you do not have a valid access card for the European Parliament, please provide your name, last name, address, date of birth, nationality, ID number, and professional status.

PREMISES

Skyguards presented to the members of the European Parliament patronizing this conference, a proposal for support based on the following premises:

On 23rd September 1998 the Committee on Foreign Affairs, Security and Defense Policy of the European Parliament adopted a proposal for a resolution on the Environment, Security and Foreign Policy, with Mrs. Maj Britt Theorin as rapporteur. The report A4-005/99 was presented the 14 of January 1999.

This extensive proposal analysed the geo-strategic changes in security following the end of the Cold War, stressing the need to manage proper disarmament in the military field in general and for nuclear weapons in particular, proposing, inter alia, that the military resources freed should be allocated to non-military purposes, one of which could be protection of the environment.

While recognizing the important part played by the armed forces in a democratic society and their role in national defence, the proposed resolution clearly states that military activity is responsible for widespread environmental destruction and societal damage, in peacetime and in war. It draws attention to the ever more powerful and more sophisticated weapons that are emerging, demanding enormous resources in terms of research and development and thus making this sector a leading consumer of advanced technology.

In paragraph T of the text it states that despite the existing conventions military research is in progress on environmental manipulation as a weapon, as demonstrated for example by the Alaska-based HAARP system. Defined as a weapons system which disrupts the climate, outside of any legal framework, HAARP is a matter of global concern and has to be regarded as a serious threat to the environment, with an incalculable impact on human life.

Paragraph U refers to the experience of the development and use of nuclear power "for peaceful purposes", characterizing it as a salutary warning as to how military secrecy can prevent proper assessment and supervision of mixed civilian/military technologies if transparency is in any way compromised. It is proposed that the wall of secrecy around military research should be dismantled and the right secured to openness, democratic scrutiny and parliamentary control of military research projects.

What has happened since adoption of this resolution in 1998? In the absence of an institutional policy of transparency on the subject at both the national and the European level, European civil society is becoming organized and is seeking protection, addressing its appeal to the highest level of European governance.

SKYGUARDS view is that the demands and proposals of the report on the Environment, Security and Foreign Policy resolution remain valid today. We accordingly wish to stage a follow-up conference to draw attention to some of the positions expressed in the said report after 12 years of further evolution of the situation.

Resume of the conference

Entitled "**Beyond theories of weather modification - civil society versus geoengineering**", this conference aims at bringing to the European Parliament the problematic of European people concerning clandestine aerosol spraying of all the skies of Europe. Apparently comprising an element in ongoing weather modification, the spraying takes place outside of any legal framework and clearly violates citizens' rights to protection of their health and physical integrity. Despite the seriousness of its implications for life on this planet in general, national governments do not attempt to oppose it, and indeed deny that it is occurring.

The conference will address the current situation vis-à-vis geo-engineering activity and weather modification, with contributions from such recognized experts as Pat Mooney of the ETC Group. Statements will be presented from parliamentarians of member states and civil society organizations. The demand is that European institutions open a public debate, taking immediate action to expose, and ban this unprecedentedly destructive activity that is being pursued without citizens' knowledge and in defiance of the precautionary principle.

Complementary event

The multi-awarded film "**Why in the world are they spraying?**", will be screened the 8th April at 6.30 p.m. In the European Parliament, Altiero Spinelli - ASP 1G3.

This is an investigative documentary on one of the many agendas associated with clandestine aerosol Spraying/geoengineering programs, "weather control". As Barbara H. Peterson from, Farm Wars, puts it, *this film is by far the most in-depth analysis of the chemtrail/geo-engineering issue that I have seen to date, clearly outlining the motives behind this insidious program of altering natural weather patterns, changing soil chemistry, and taking control of our food supply in the process.*

The producer, of the film, Mr. Michael Murphy will be there for questions and debate.
